

### **Health and Safety Standards--Facial Services.**

- (a) Cosmetologists and facialists shall wash their hands with soap and water, or use a liquid hand sanitizer, prior to performing any services on a client. Gloves shall be worn during any type of extraction.
- (b) Equipment, implements, tools and materials shall be properly cleaned and disinfected prior to servicing each client in accordance to this rule.
- (c) Facial chairs and beds, including headrest for each, shall be cleaned and disinfected prior to providing service to each client. The chair shall be made of or covered in a non-porous material that can be disinfected.
- (d) After each client, the following implements shall be cleaned and disinfected: tweezers and comedone extractors.
- (e) The following implements are single-use items and shall be discarded in a trash receptacle after use: cotton pads, cotton balls, gauze, wooden applicators, disposable gloves, tissues, disposable wipes, lancets, fabric strips and other items used for a similar purpose as one or more of the items listed above.
- (f) The following items that are used during services shall be replaced with clean items for each client: disposable and terry cloth towels, hair caps, headbands, brushes, gowns, makeup brushes, spatulas that contact skin or products from multi-use containers, sponges and other items used for a similar purpose as one or more of the items listed above.
- (g) Items subject to possible cross contamination such as creams, cosmetics, astringents, lotions, removers, waxes, moisturizers, masks and oils shall be used in a manner so as not to contaminate the remaining product. Applicators shall not be re-dipped in product. Permitted procedures to avoid cross contamination are:
  - (1) Disposing of the remaining product before beginning services on each client; or
  - (2) Using a single-use disposable implement to apply product and disposing of such implement after use; or
  - (3) Using an applicator bottle to apply the product.
